EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

Claim 1 (Currently Amended) A method of deterministically generating maximal nonlinear block substitution tables for a predetermined block size, comprising:

- selecting a first generating function;
- selecting a second generating function;
- selecting first and second sets of complete linearly independent numbers;
- calculating first and second linear orthomorphisms from the generating functions and the sets of linearly independent numbers;
- creating a maximal nonlinear block substitution table by combining the linear orthomorphisms; and
- encrypting a clear text message utilizing the block ~~substation~~ substitution table.

Claim 16 (currently amended) A computer-implemented method for deterministically generating maximal nonlinear block substitution tables from binary data, comprising:

- selecting a first set of a plurality of complete linearly independent numbers from the binary data;

selecting a second set of a plurality of complete linearly independent numbers from the binary data;

generating a plurality of linear orthomorphisms using first and second recursive generating functions and the first and second sets of linearly independent numbers;

setting a maximal nonlinear substitution table based on a combination of the linear orthomorphisms; and

encrypting a clear text message utilizing the ~~substation~~ substitution table, wherein the clear text message is in the form of a sequence of binary numbers.
